Using your Value Permit

If you are parking in either a ramp or garage, please be aware it may be equipped with an electronic gate system.

When entering and exiting the parking structure, place the bar code on the back of your hangtag against the bar code reader. When the bar code reader beeps, the system will raise the gate.

The bar code reader is located to the left of the ticket dispenser, under the card swipe.

If “Lot Full” signage is present, please proceed - this does not apply to Value Permit holders.

For assistance at the scanner, press the Intercom button.

Don’t forget to hang the permit from your rearview mirror with the lot number facing out.
