Using a Value Permit

Campus parking garages and ramps are equipped with an electronic gate system. Your value permit will allow you access to a specified lot.

When entering and exiting the parking structure, place the bar code on the back of your hangtag against the bar code reader. Once the bar code is scanned, the gate will raise.

If the “Lot Full” signage is lit up, please proceed--this does not apply to value permit users.

For assistance at the scanner, please press the intercom button.

Remember to hang the permit from the rearview mirror, lot number facing out.
Using a Value Permit

Campus parking garages and ramps are equipped with an electronic gate system. Your value permit will allow you access to a specified lot.

When entering and exiting the parking structure, place the bar code on the back of your hangtag against the bar code reader. Once the bar code is scanned, the gate will raise.

The bar code reader is located below and to the left of the touchscreen area.

If the “Lot Full” signage is lit up, please proceed--this does not apply to value permit users.

For assistance at the scanner, please press the “help” intercom button.

Remember to hang the permit from the rearview mirror, lot number facing out.
