1. Call to Order: 8:32am

• **Introductions**

- Approval December 15, 2023 Minutes – motion to approve the minutes by Bernie Lesieutre & second by Alex Frank
 - **Approved:** Passed voice vote with correction [10th bullet under Discussion included (not limited too) change from **MOTION** to **CONSIDERATION**]

2. Transportation Services Reports & Updates

• **Assistant Vice Chancellor Updates: Patrick Kass, Assistant Vice Chancellor**

- **Salary Based Permit Recommendation Update PowerPoint Presentation (Action Item)**
 - Additional Models for Salary-Based Parking at UW-Madison
 - Four models were presented for consideration in the November/December 2023 meetings
 - CTC requested additional models be developed that incorporate not only salary-based pricing models, but also continuation of tiered parking lots.
 - **Additional Models are as follows:**
 - **Model 1 | Percent of Salary by Lot Tier**
 - Tier 1 Parking Lots/Facilities | Projected # of permits 4,106 | Gross% of Salary Cost 1.15% | Customer w/o salary date pay \$944 | Price Cap: \$2, 500
 - Tier 2 Parking Lots/Facilities | Projected # of permits 6,359 | Gross % of Salary Cost 1.45% | Customers w/o salary data pay \$1,350 | Price Cap: \$3,000
 - **Model 2a | Salary Band Equal Distribution**
 - **Model 2b | Defined Top & Bottom Bands**
 - **Model 3 | Percent of Salary with Cost of Entry**
 - **Comparison of Additional Salary-Based Pricing Models**
 - Models would have to be recalculated annually
 - High amount of variability in pricing
 - High levels of complexity and assumptions in all models
 - 40-53% of customers would pay more for permits
 - Each model benefit lower paid employees but does not include 2nd & 3rd shift employees
 - None of the models will change prioritization policies

- **Motion:** made by Mark Wells to keep the current parking rate structure which includes the subsidized reduce cost parking rate program.
 - **Discussion:** Concerned about customer service and the complexity of the models. The models do not address the shortfalls of the supply and demand of parking at the University. The models would require hiring more Transportation Services staff to process the data and permits.
 - **Motion approved:** 6 Yes 0 No 1 Abstain
